

PRESS RELEASE

re:cap global investors advises New Energies Systems on sale of 15.6 MW Weiler wind farm

Zug, March 30, 2021. Successful closing: New Energies Systems AG sells a turnkey German onshore wind farm to Pacifico Renewables Yield AG. The transaction was accompanied by the internationally active investment advisor re:cap global investors ag. re:cap acted in a sellside advisory role for New Energies Systems AG.

The wind farm sold is located in the Vordereifel region of Rhineland-Palatinate and has a total capacity of 15.6 MW with its five Nordex N131 wind turbines. The project saves almost 30,000 tons of CO₂ per year. The wind farm still benefits from a remuneration of 79.30 euros per MWh over 20 years, which is fixed according to the EEG 2017.

"In the case of EEG projects in the wind onshore sector, the expansion figures in Germany are unfortunately very low. However, the search for a suitable investor should not be underestimated," says Thomas Seibel, CEO of re:cap global investors ag. "The road from the initial approach of potential buyers to successful signing and closing is long. If negotiations with an interested party fail shortly before the end, the entire process has to be restarted. This costs time and money. Thanks to our broad network in German-speaking countries, we were able to identify a suitable investor for New Energies Systems AG at an early stage and thus contribute to a smooth transaction."

Helmut Schmitz, CEO of New Energies Systems AG, says: "The sale of a wind farm, the search for a suitable buyer and the associated negotiations are complex processes. We are therefore very pleased to have found a professional partner in re:cap, who advised us on the transaction. We hope to continue the trustful cooperation in the future."
